

## Volunteer-Monitoring Regions

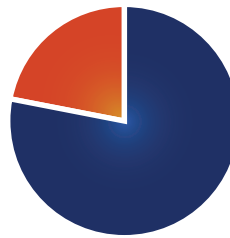

Riverkeeper volunteers adopt and monitor strategic sites along the Columbia River and tributaries in our six monitoring regions: The Estuary, Longview, Portland/Vancouver, Gresham, Columbia River Gorge and Wenatchee.

## E.Coli Monitoring

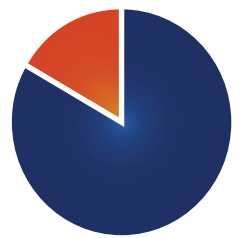

Every month, volunteers in the Columbia River Gorge region collect river samples to test for bacteria contamination. E.coli's presence in the river indicates fecal contamination.

### Tributary Sites

**5:13**  
18 sites total

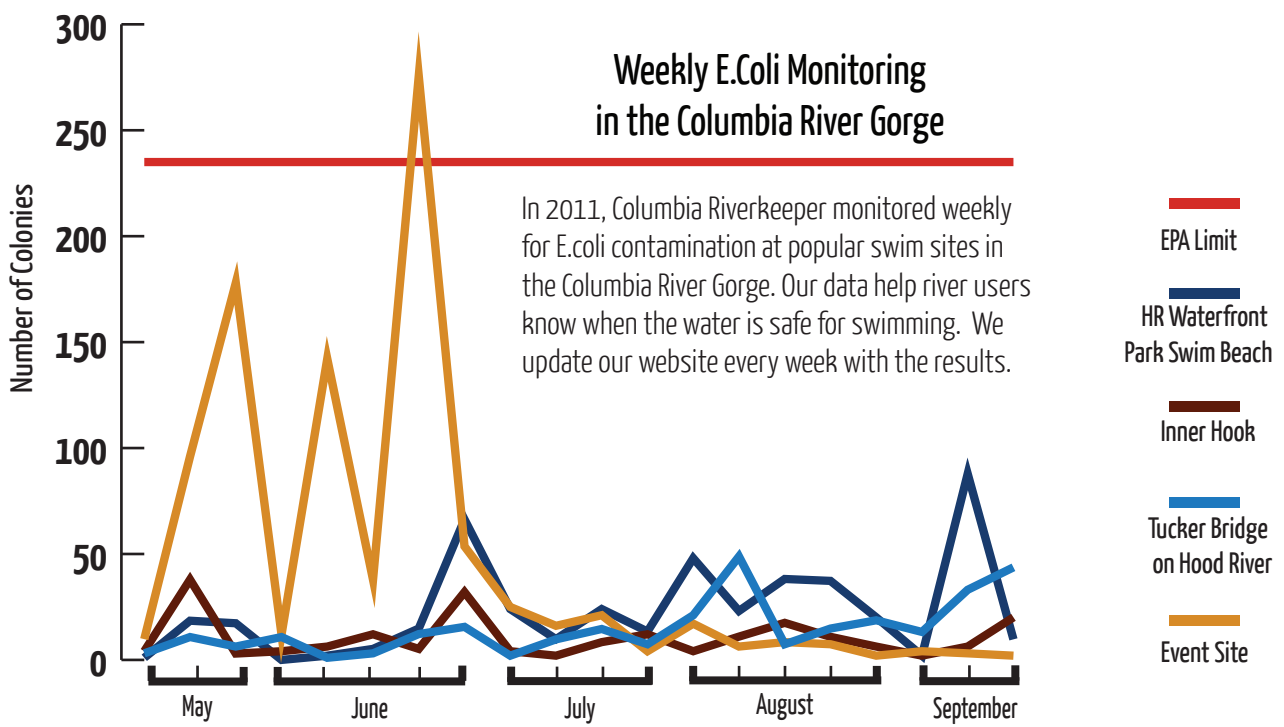

### Columbia River Sites

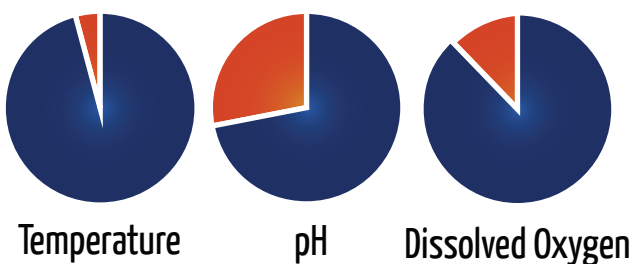

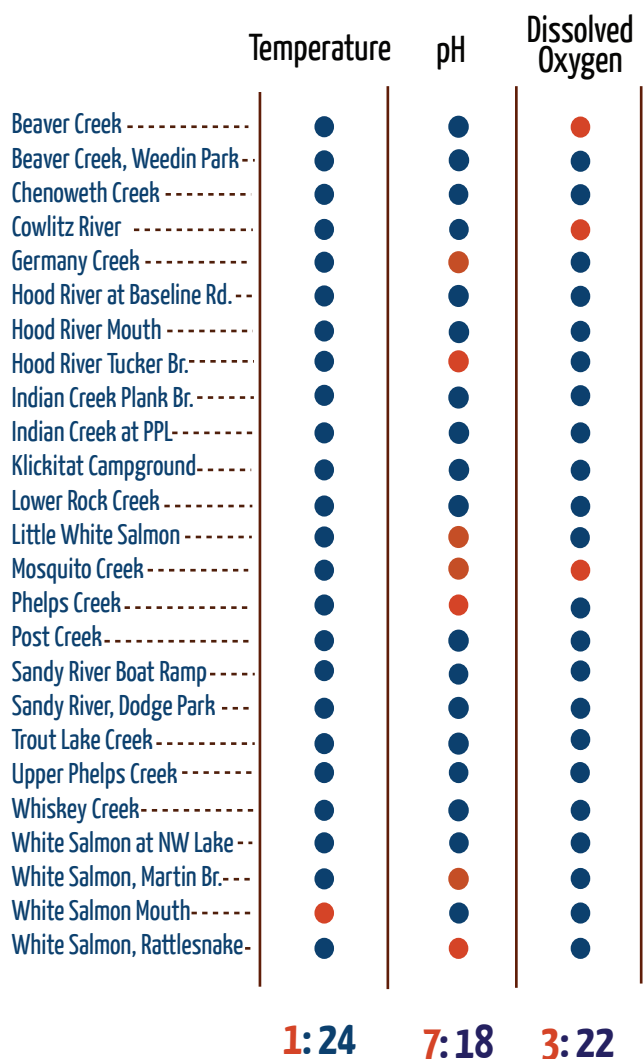

**2:8**  
10 sites total

● Sites **exceeding** the water quality standard at least once in 2011

● Sites **not exceeding** the water quality standard in 2011

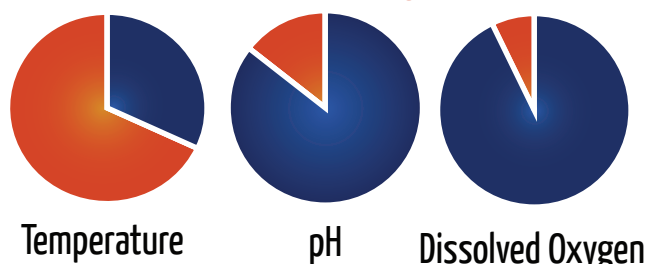

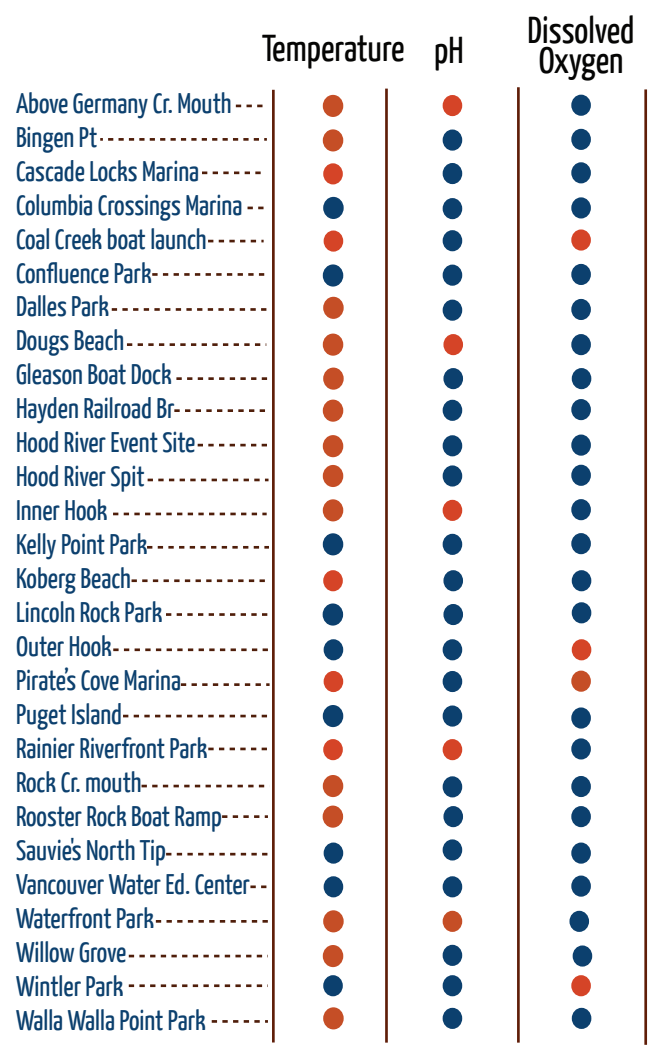

## Tributaries of the Columbia River Volunteer-Monitoring Sites

● Sites **exceeding** the water quality standard at least once in 2011

## Columbia River Volunteer-Monitoring Sites

● Sites **not exceeding** the water quality standard in 2011
